## Student Achievement

## Locally Defined Indicators

Effective schools research indicates that high attendance is an indicator of potential student achievement. School attendance is an indicator of school and later career success. Therefore, the IKM-Manning Community School District recognizes the importance of student attendance and monitors the average daily attendance in each building.
Concurrent Enrollment course data is based on the number of seniors who participate in at least one concurrent enrollment course. The student who successfully completes a concurrent enrollment course receives DMACC credit as well as IKMManning High School credit toward graduation requirements. The IKM-Manning Community School District believes it is important for students to have access to rigorous, high-level instructional content. Providing concurrent enrollment courses within the IKM-Manning High School building gives students access to these types of courses during the school day and without added travel time. Therefore, the district strives to increase the percentage of 12 th grade students enrolling in at least one concurrent enrollment course.
